

Participation in the "28th National Science Exhibition"

- Bose Institute participated in the "28th National Science Exhibition" at the Central Park Maidan, Salt Lake, Kolkata, from 21st to 24th August 2025. It is a famous event where thousands of school, college and University students participate every year. The pavilion of the Bose Institute was the centre of attraction for this four-day event, with exquisite models, physical and chemical science demonstrations, and live cell imaging under a microscope. Scientists and technical staff members from the Bose Institute attended our pavilion continuously to 'disseminate the knowledge' following the footsteps of Sir J C Bose, our illustrious founder.
