

Academic visit to the Unified Academic Campus on 07.04.2025

The class XII students from the Delhi Public School, Howrah, made an academic visit to the Unified Academic Campus on 07.04.2025. They visited Prof Achintya Singha's laboratory, where Dr Singha explained the basics of the Raman effect and demonstrated the Raman Spectroscopy. The students visited Prof Anup Kumar Misra's laboratory, where the research scholars demonstrated TLC and different column chromatography techniques. The Biology students observed the hands-on gel electrophoresis technique in Dr Basudeb Maji's lab. The Computer science students were delighted to interact with Prof Soumen Roy since he enthralled them with the basics and applied aspects of computer application with AI technology. It was a memorable visit for the students since they promised to stick to basic sciences and pursue scientific research as their career. It was an excellent outreach activity for the school students, organized by Bose Institute recently.
